

Ushan Buddhacharya

Creative Full Stack Developer

About Me

I am a young, dynamic individual seeking challenging positions in the world of Information Technology, where I can learn & grow my skills with ability to follow established procedures, working under little or no supervision.

My goal is to build a career with leading corporate hi-tech environments, with committed and dedicated people, offering technical expertise in programming analysis, application analysis & design, where I can realize my true potential and am willing to take the ownership to work as a key player in a challenging and creative environment.

I've had hands-on experience in all stages of systems development life cycle and have a proficient knowledge of developing the customized Content Management System (CMS) for various clients. I've got the best exposure of web design and development tools including the Laravel Framework, PHP, MS SQL and Vue JavaScript Framework.

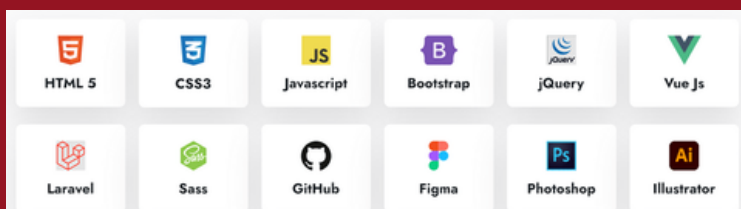

I also have a strong client facing and communication skills working in various support and maintenance projects. I also have an advanced skill in software troubleshooting, help desk support, database management and remote control and am an extensive multi-tasking skill required for any projects.
